

Veteran's Tiny Homes

Many veterans face challenges returning from military service - finding a decent job, making a living wage, reintegrating back to civilian life, navigating the maze of support service providers, overcoming gaps in the VA system, physical and emotional stress. Military veterans still make up a disproportionately large sector of the homeless nationwide.

Many veterans cannot sustain incomes needed for their own homes or apartments. Too many slip through the safety net and become homeless. OCO Tiny Home offers an affordable, healthy, respectful alternative to shelters, halfway houses and unsafe community living arrangements.
